

Prof. Zhiliang Wu

Professor

Gifu University, Japan

Zhiliang Wu is Assistant Professor of School of Medicine in Gifu University, Japan and Adjunct Professor in Jilin University, China. He received master degree in Malaria immunology from School of Medicine in Beijing University in 1987 and PhD degree in molecular biology of *Trichinella* from Gifu University in 1999. During his early research career, Dr Wu carried out the researches on immnodiagnosis of schistosomiasis and genotyping of *Cryptosporidium*. Since 1999, his work focuses on *Trichinella*, mainly on molecular mechanism of nurse cell formation, characterization of excretory-secretory proteins, and immunomodulation by infection and *Trichinella*-derived proteins. In addition, he conducts on international cooperation research on biomarkers and molecular mechanism of tumorigenesis of opisthosis-induced cholangiocarcinoma.
