

Dr. Joseph Turner

Doctor

Liverpool School of Tropical Medicine, UK

Joseph Turner is a Principal Investigator and Senior Lecturer at The Research Centre for Drugs and Diagnostics, Department of Parasitology, Liverpool School of Tropical Medicine. Dr Turner's laboratory researches host immuno-pathological consequences of filarial parasitism and treatment responses, utilising novel preclinical models of human filarial infection. Dr Turner's laboratory is supporting drug discovery and development programmes for filariasis, including clinical translation and implementation of antibiotic therapies targeting the filarial endosymbiont, *Wolbachia*, for the treatment of lymphatic filariasis and onchocerciasis.
